

BELGIAN SAILING

Sailor of the Year Manager

Jurgen Cluytmans started his career as class measurer in optimist and 470 but went quickly on in technical committees of World Sailing. During the Tokyo 2020 games he was responsible for several classes and during the Olympics 2024 he is appointed as the leader of the Equipment Committee. The Award of Manager of the year is very appreciated for what he calls a derelict pastime that very often takes place in the background of big events but which is the key to fair competition on the highest level. The world direction the Paris Olympics started already and holds quite a few challenges to be ready! [More](#)
